

# Trans1000®

10 year  
warranty

Demonstration  
in video

The Trans1000 variable geometry transfer trolley® allows you to handle, lift and work at an ergonomic height.

It is particularly suitable for handling long loads such as bars, tubes and plates.

## Performance and ergonomics

- The variable geometry allows the height (770/1200 mm) and length (1050/1860 mm) of the trolley to be adjusted to suit the desired use.
- Lifted by 2 manual hydraulic cylinders with an arm control.
- Equipped with 3 swivel castors with brakes and one directional castor with 2-position locking for longitudinal or transverse movement.
- Telescopic lever operating the lift.
- Equipped with folding stakes for better load support and motorized esca rollers to facilitate load sliding.

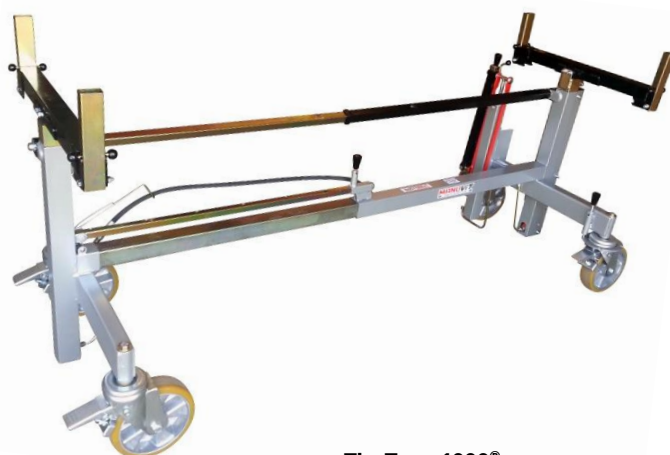

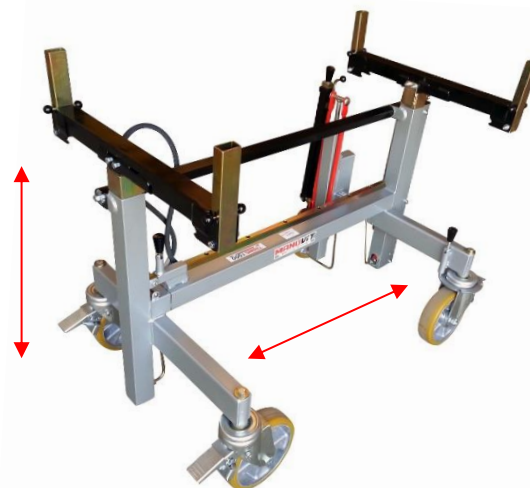

## Options

- Wide range of standard and customised accessories depending on the load to be handled, electric lift, length up to 5 m.

## Maintenance and warranty

- 10 year warranty excluding wearing parts.
- Spare parts available from stock.
- Maintenance contract on request: service provided by our teams. Subscription possible for new or existing Manuvit equipment.

Moreover, as nothing should justify throwing away a product under the pretext that it is damaged, we are able to put back in use all the materials of our manufacture and this, without limit of duration.
