

# Roulfût®

10 year  
warranty

Demonstration  
in video

**These trucks can handle drums of up to 350 kg effortlessly. The models with the winch option are designed to drop or pick up a drum on a pallet.**

## Performance and ergonomics

- Allow intensive handling of rimmed or fully open drums depending on the model.
- The ingenuity of the system lies in the height-adjustable self-tightening clamp, which can handle several drum diameters. This technique of gripping from the top of the drum eliminates the effort of sliding the drum onto a flap.
- Stand equipped with a barrel lowering damper.
- Small footprint.

## Option

The lifting winch allows effortless palletising or depalletising of a drum by leaving the hand truck on the ground without the need to lift or lower the hand truck from the pallet. The operator is then spared the effort of supporting the weight of the drum as it is raised or lowered from the pallet. Maximum height of the drum on a pallet: 1080 mm.

## Maintenance and warranty

- 10 year warranty excluding wearing parts.
- Maintenance contract on request: service provided by our teams. Subscription possible for new or existing Manuvit equipment.

*Moreover, as nothing should justify throwing away a product under the pretext that it is damaged, we are able to put back in use all the materials of our manufacture and this, without limit of duration.*

Equipped with the hoist option

Grounding of the barrel without sliding effort on a flap
